

Summer Natural Daily Changes Timeline

**Physical
Environment**

**Natural
Environment**

**Red
Squirrels**

Cut out the following boxes and place them in the correct places on the Summertime Natural Daily Changes Timeline.

Dark

Birds start singing

Leaves catch sunlight to make food

Getting warmer

Birds look for food

Bats fly, hunting insects

Feeding the kits in the drey

Sun rises

It is too hot to move. Take a nap on a branch or in the drey.

The sun is high in the sky creating short shadows

Owls come out to hunt for mice

Cooling down

Cooler now, search for food but watch out for predators

Sun sets

Sun is low in the sky creating long shadows

Flowers fully open letting out scent to attract bees and butterflies

Time to be active and looking for food

Start to see stars

Kits play close to the drey whilst it is still cool

Cold

Asleep in drey

Now it is cooler, the deer leave the cool forest and graze in the grassland.

Sun is overhead and very bright.
